

Environmental Toxicology Major Sample Study Plans

These sample schedules are designed to give students an idea of the timing of required and elective coursework. It is only a guide and not a substitute for a meeting with your advisor to plan your schedule.

Your faculty advisor is a valuable resource and can be a mentor as well as a connection to opportunities for lab research, internships, and coursework to support your area of interest (emphasis). Your faculty advisor should sign off on your Restrictive Electives before you enroll in the courses to ensure that it is approved and will count towards your major.
